APAC CIO Outlook 25 MOST PROMISING HEALTHCARE TECHNOLOGY SOLUTION PROVIDERS - 2016

Ensuring sound health has been a matter

of concern for an indeterminable period of time. Accelerating from an age when 'Healthcare' meant solutions to simple ailments, the term now in the 21st century gets applied in resolving the most complicated healthcare issues. In the attainment of providing the most intricate healthcare solutions, it has evolved to become one of the most rapidly growing industry globally.

The 21st century has seen a whirl wind of advancements in the Healthcare industry with more focus towards rendering better quality of service across healthcare institutions and renewed commitment for advancement of medical science. The technological progress in medical science has led to the arrival of numerous Healthcare firms bringing with them an array of professionals solely devoted to maintain and improve of public health. The Healthcare industry has grown leaps and bounds over the years with an estimated worth of \$30 billion and contributing a healthy 9.8 percent of the GDP in the First-world countries. Healthcare in 2016 is not merely about identifying and promoting innovations in medical science, it is rapidly moving towards crunching data to offer better diagnosis and treatment, constructing a robust financial system and communication lines between doctor to doctor and doctor to patient. And this is where healthcare technology solution providers play their part where they render, share, coordinate and ultimately help diagnose problems at reduced medical errors and relatively effective costs.

This issue of APAC CIO Outlook magazine brings to you "25 Most Promising Healthcare Technology Solution Providers" consisting of some of the most renowned Healthcare management companies who have managed to carve a niche for themselves in this important sector with their dedicated effort and time towards an enhanced life experience. This list is aimed at helping entrepreneurs and people alike to choose their Healthcare partners to suit their specific requirements, realize greater efficiency, reduce operational costs, augment their customer base etc.

Altus Solutions:

The Transformational Edge to Clinical Care Technology

Since the dawn of human civilization, it has been observed that the Asian Continents have been more advanced in healthcare. In spite of the abundance of recent modern medicinal breakthroughs, these have done little to decelerate the growth and spread of traditional medicine applications in the many cultures of Asia yet today. On the other hand, with the rapid proliferation of technology in modern medicine, it has now achieved mainstream status within such a relatively short period of time in our recorded human history. Patients today are more inclined towards the comfort and quick effects of modern medicine and this has created a greater demand especially in Asia Pacific region where the population is considerably higher. Rendering healthcare for such a huge population is fraught with many challenges and issues including managing huge patient databases and keeping track of patient treatment records. Of the several esteemed Malaysian healthcare solution providers, Altus Solutions Sdn Bhd is one such organization that empowers healthcare organizations in the country by providing innovative solutions to handle IT data management challenges. Formed in the year 2010 in Kuala Lumpur, the core of Altus' team comprises of like-minded individuals who are experienced, passionate and motivated to providing the best solutions and services for the advancement of healthcare IT.

Since its inception, Altus' primary objective has been about providing IT solutions in support of clinical care and research that focus on using our solutions for process improvement activities and quality delivery of services. Over the years, Altus has developed a multitude of software and web based such as eClinReg clinical disease registry management system, CDMS chronic disease management clinic system with tele-medicine features which connect to diagnostic machines, ClinSoftware clinical trial solutions, Healthcare Performance Monitoring and Reporting System, medical research ethics submission-review-approval system, transplant waiting list system and many other healthcare solutions. Altus has

earned its recognition as a Silver Midmarket Solution Provider, Microsoft Small Business Partner, IBM Business Partner, Dell Partner Registered Company, etc.

Having worked with many large Malaysia's healthcare datasets, data management services such as probabilistic data de-duplication, data matching and data coding, data standardization, stress test,

Altus has earned its recognition as a Silver Midmarket Solution Provider, Microsoft Small Business Partner, IBM Business Partner, Dell Partner Registered Company

health informatics, data analytics and data mining are another strong forte of Altus Solutions' team. "We also partner with statistical analysis companies and clinical data management companies to provide a more integrated one stop service for our clients," adds Lim, Managing Director.

Altus strives to keep up with the changing tides in the IT industry and to this end has developed some mobile applications and will strive to develop more patient-centric mobile applications for public market. E-commerce and SEO Service is also another solution that Altus has taken upon itself to deliver to the Healthcare industry. As with any total solution provider, Altus Solutions also provide IT hardware and infrastructure related services for our clients. Altus Solutions has a team of personnel who are well trained in guidelines and requirements of clinical research and clinical environment setup.

The company intends to further extend its area of influence to other parts of the Asia Pacific which are slowly developing and opening up its business on a global scale. **ACD**
